

Group 3      Date: 02/10/2023      Time: 11 am      Duration: 30 Minutes

Present, on time: Mike Squires, Alex Escatel, Daniel Alzeidan, Hamza Ali

Present, not on time: None

Absent: None

### **Synopsis:**

In this meeting we went over what we all have accomplished and laid out the goals for the next week and making sure everything works.

### **Recent Individual Accomplishments:**

Mike - Got basic front end stuff configured and added a basic intro prompt

Alex - Made a connection to the database and set some initial design principles

Dan - Got codebase set up and did basic front end components

Hamza - Did research on arduino components and firebase connection

### **Current Individual Activities:**

Mike - Add map to the front end

Alex - Research authentication and formalize data through put to front end using a standardized json format.

Dan - Add authentication screen

Hamza - Buy parts for arduino and test with firebase

### **Individual Action Items:**

Mike - Do research on the geocode api and implement the very basic map.

Alex - Get some basic authentication going through a react login component. Provide mock data for a map api to add waypoints.

Dan - Work on front end authentication and test

Hamza - Test firebase connection with the arduino data
