

Group 3 Date: 01/30/2023 Time: 11 am Duration: 30 Minutes

Present, on time: Mike Squires, Alex Escatel, Daniel Alzeidan, Hamza Ali

Present, not on time: None

Absent: None

Synopsis:

Talked more about what tools we want to use besides React and JS. We talked about a couple of potential database systems including services from Google and Amazon. We also decided who would start to set up the front end and who would start to set up the backend/database system.

Recent Individual Accomplishments:

Mike - Researched JS and React

Alex - Research the best database implementation for data scale

Dan - Researched JS and React

Hamza - Researched Arduino and Database

Current Individual Activities:

Mike - Setting up React starter code

Alex - Database api research and integration

Dan - Setting up React starter code

Hamza - Setting up Arduino and Database as well getting the components required

Individual Action Items:

Mike - Finish setup of React starter code and come up with ideas for the first version of the main webpage.

Alex - integrate some start api code and proof of concept data manipulation

Dan - Finish setup of React starter code and come up with ideas for the first version of the main webpage.

Hamza -.Getting the components needed and setting up the Arduino and database
