

Group 3      Date: 3/10/2023      Time: 11 am      Duration: 30 Minutes

Present, on time: Mike Squires, Alex Escatel, Daniel Alzeidan, Hamza Ali

Present, not on time: None

Absent: None

### **Synopsis:**

In this meeting we communicated to add improvements to the web application with the login screen and the UI of the map and adding security with collecting the data from the Arduino and API key.

### **Recent Individual Accomplishments:**

Mike - Added some styling of the login screen

Alex - Added some internal database functionality to pull from the live db

Dan - Added some styling to the map screen

Hamza - Finished researching the ways to secure API key for Arduino for potential attack to the Arduino

### **Current Individual Activities:**

Mike - Working on adding the navigation bar

Alex - Working on a scheduler to pull data not too frequently

Dan - Working on adding circles to map

Hamza - Apply what I learn to make the data collection more secure for Arduino

### **Individual Action Items:**

Mike - Get navigation bar to work

Alex - Look closely at how data operations are changing to make sure that the internal database api is robust.

Dan - Get cricels to work

Hamza - Adding an in-between with the Arduino and the API key for security
